

NEW SASH FILLER REDUCES COSTS AND INCREASES LINE SPEED

Filling Solutions provide the solution to the UK's premier spray-tan company, Sun Laboratories UK Limited of Derbyshire. The new equipment has reduced manpower by 50% and increased process speed by a third.

Says MD, Mark Bradley, *"Filling Solutions were very co-operative. They installed the machine for a free trial period for us to see for ourselves whether it met our requirements. We were well pleased; we only need one operative to run the machine, whereas when we were filling by hand we needed two. Filling time has reduced significantly and we have calculated that the equipment payback will be around 6 months."*
